"THE POWER OF WATER"

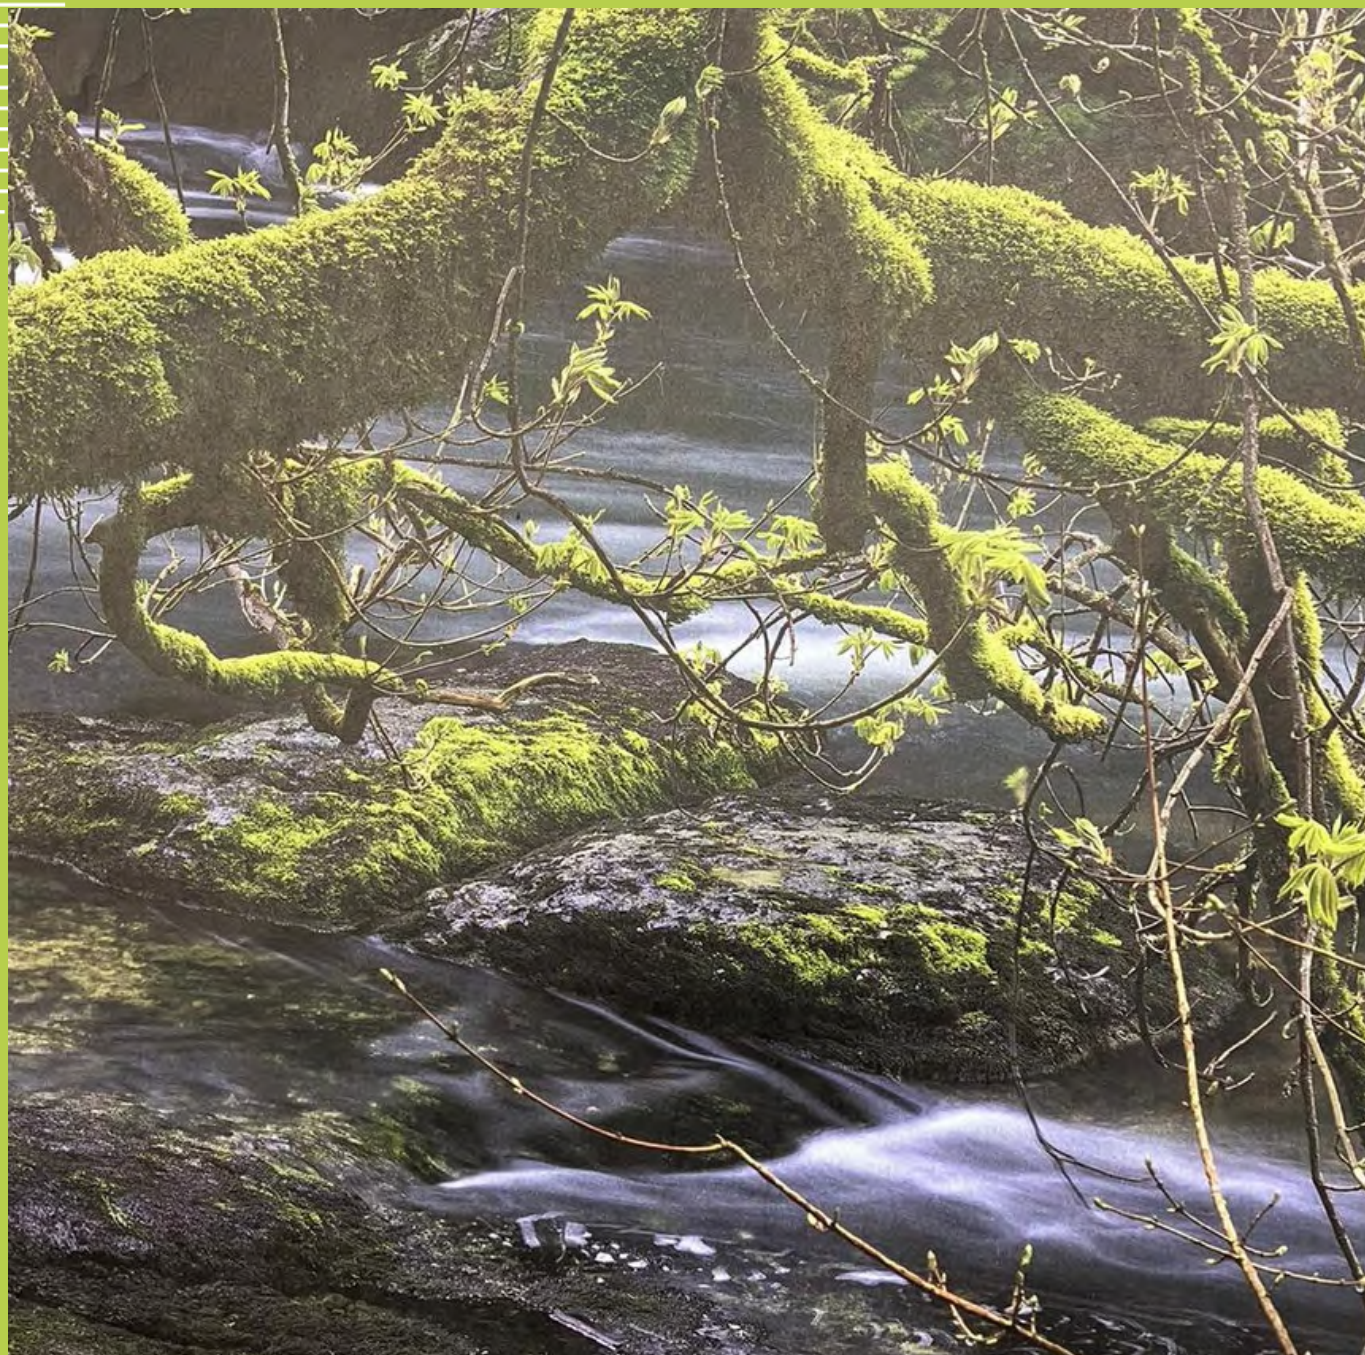

" I picked this picture because for me it somehow represents the power of water in the sense of creating life and also having a force for destroying (for example enabling trees to grow but also have the power to kill animals and humans within seconds." Helena

"It is just a small drop but it has a huge effect on our world."

"THE POWER OF WATER"

"Snow is a form of water. I thought about the power of water in the form of avalanches. And also to the large capacity of snowfields and glaciers that store fresh water for the summer."

Jacopo

"I picked this image because when i think about the power of water, i imediately see the image of the recent floodings near the town where i live. It was almost completely destroyed ..." Roberto

"Enormous power is hidden in a small drop. We need to care for it and protect it because the power is not eternal ..." Gabriele
